The committee reviewed the proposed curriculum for MCG's "Pain and Anxiety Management: Local Anesthesia and Nitrous Oxide/Oxygen Sedation for Dental Hygiene" course for the board's consideration. Discussion surrounded the following:

- The committee envisions that the course be in addition to the established DH curriculum.
- The committee envisions that a 6 month temporary permit would be issued to allow for supervised practice that requires a certain amount of anesthesia deliveries before certification. The ED expressed concern about resources needed to take on this additional responsibility.
- The program would be taught by a dentist.
- A remediation plan would be developed to allow for failures.
- Upon receipt of the documented deliveries via a log – the board would require an examination. A national examination already exists.
